

Web Designer

Internship

If you strive to design intuitive, fluid web apps that not only makes a user's experience enjoyable, but looks great as well, **Morse Data Corporation** needs you!

We have a **Web Designer Internship** available for a rare opportunity to be part of something big in development at **Morse Data Corporation**.

What's involved?

- Work **on-site** with various members of a **full-time** development team in wireframing, designing, and styling an enterprise web app

What you will learn:

- How to implement enterprise-grade **UI/UX** design techniques
- How to work with a development team in an **agile** environment
- How to **brand** a web application according to a **style guide**
- How to utilize **cutting-edge** technologies and frameworks

What's required?

- You are currently enrolled in a **Web Development, UI/UX, or Graphic Design** major
- You have experience with **HTML5** and **CSS3**
- Experience with **JavaScript/JQuery/Angular 2+** is a plus
- You're available to work 15-20 hours per week

If you want to work with a team of experts that have a passion to deliver a memorable user experience, **this is your moment**.

If you're interested, email us your portfolio/resume including a cover letter detailing your availability, GPA, aspirations, and qualifications to careers@morsedata.com.

About **Morse Data Corporation**

Morse Data Corporation, incorporated in 1975, is an independent software company. We are an innovative leader in the development of enterprise management systems for national and international businesses in eCommerce, multi-client fulfillment, publishing, and multi-channel merchants.

9661 West 143rd Street Suite 200, Orland Park, Illinois 60462
